## **AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions and listings of claims in the application:

(Currently Amended) An information processing apparatus comprising:

 a display case provided on a main body of the information processing apparatus;
 a driving mechanism which opens or closes the display case on the main body;

means for remotely controlling operations of the driving mechanism <u>via an</u> <u>embedded controller/keyboard controller IC</u>,

wherein the driving mechanism opens the display case when a predetermined device of the information processing apparatus starts a predetermined operation.

## 2-3. (Canceled)

- 4. (Previously Presented) The information processing apparatus according to claim 1, wherein the driving mechanism opens the display case in synchronous with a startup timing of a program in accordance with operation of the means for remotely controlling the driving mechanism.
- 5. (Original) The information processing apparatus according to claim 1, wherein the means for remotely controlling the driving controls the driving mechanism

via one of a wireless LAN, BlueTooth, an infrared-ray communication, and a telephone line.

- 6. (Original) The information processing apparatus according to claim 1, further comprising means for controlling display of a display device provided in the display case associated with operation of the driving mechanism.
- 7. (Original) The information processing apparatus according to claim 1, wherein the driving mechanism opens and closes the display device with a speed set by an instruction from a user.
